Mathematics/Statistics 425
Course Information

Professor: Michael Woodroofe
462 West Hall
763 3495
michaelw@umich.edu

Grader, Section 002 (11:30)
Gbenga Olumolade
437 West Hall
Thursday 11:30-1:00
gbenga@umich.edu

Office Hours: Monday, 1:30-2:30
Tuesday, 11:00-12:00
Wednesday, 2:30-3:30

Grader Section 004 (4:00)
Runlong Tang
Friday, 1:00-3:00
rltang@umich.edu

Grading: There will be five problem sets, one midterm and a final. These will be counted as follow:

- Homework 30%
- Midterm 30%
- Final 40%

About The Course

The course will provide and broad introduction to the theory of probability and its application. Wednesday's lecture will often provide an overview of a portion of the text, for example a chapter, illustrated by simple examples. Details and more complicated examples will be considered on the following Monday. Between Wednesday and Monday, students are expected to read that portion of the text carefully and to try some of the suggested problems.
